- Java
- Python
- HTML, CSS
- JavaScript
- Git

EXPERTISES:

- Positive thinker with good communicative competences
- Fast and interested learner in a variety of subjects
- Outstanding teamwork capacity
- Strong time management

ABOUT ME:

Hello I am João Marinho, currently attending a Master´s Degree in Informatics and Computing Engineering at FEUP.

I have always been an active person, having tried various sports throughout my life. The one that stands out the most is rowing, where I competed nationally and achieved the podium with my team. Furthermore, I finished a basics music course playing the Double bass having managed all this with my discipline and dedication.

During my free time, I enjoy spending time with my beloved ones, where I can fool around and in contrast learn a lot through their knowledge. Moreover I still practise sports, having stuck with a new one, Crossfit.
